GABLE TRIM	HOUSE RAKE	DRIP EDGE
BASE ANGLE	RAT GUARD	DOOR POST TRIM
J - CHANNEL	JEFF CHANNEL	OVERHEAD DOOR TRIM
ENDWALL	SIDEWALL	W - VALLEY

CRINKLE COLORS ARE SPECIAL ORDER AND TAKE 3 WEEKS LEAD TIME

## IMPROVEMENTS OF TEXTURED PAINT

- Reduced glare. The textured paint greatly reduces the glare that a metal roof can have. This contributes to a more appealing overall appearance.
- Better scratch resistance. Because the metal's surface is textured, it will resist minor scuffs and scratches.
- Increased traction. If you've ever had to walk on a metal roof, you know how difficult it can be to maintain traction depending on the conditions. The textured surface significantly improves traction. This is advantageous to both installers and homeowners.
- Hides under decking imperfections. Because of the reduced glare of the textured metal, any substrate imperfections will be less noticeable.
